Thierno Diallo

Full Stack Java / Angular Developer

~5 years of experience · 3 companies · healthcare and public sector

Full Stack Java / Angular developer with nearly 5 years of experience, I design and build robust, scalable business applications, from understanding the need to going live. Specialised in Java, Spring Boot and Angular, I have worked on projects in demanding environments such as healthcare and the public sector, covering the whole development cycle: design, development, testing, cloud deployment and production monitoring, with a strong focus on code quality, architecture and maintainability.

PROFESSIONAL EXPERIENCE

Berger-Levrault

Oct. 2023 — Present

Full Stack Java / Angular Developer

Corrective and evolutive maintenance of medical activity management applications (pre-admissions) for public and private healthcare facilities — **BL.PBO, BL.MEP, BL.SFP**.

Java 25 · Spring Boot 4 · Angular 22 · TypeScript · RxJS · Angular Material 3 · SCSS · PostgreSQL · Flyway · jOOQ · Hibernate · Docker · Azure · Ansible · SonarQube · GitLab · Jira · Confluence

- Development and maintenance of business applications in the healthcare field
- Contribute to the successive upgrades of the technical stack: Angular 16 → 18 → 20 → 22 and Java 17 → 21 → 25
- Contribute to architecture choices and development best practices
- Suggest continuous improvements to performance and code maintainability
- Take part in functional and technical requirements analysis
- Perform cross-testing, code reviews and write unit tests to ensure quality
- Prepare delivery packages and deploy to acceptance, demo, pre-production and production environments
- Provide post-deployment on-call support and monitor application logs
- Contribute to continuous improvement of solutions and processes; documentation and automation to gain quality and productivity
- Write functional documentation
- Work daily with the other teams of the Healthcare BU
- Take part in agile ceremonies (daily, sprint review, retrospective, sprint planning)

Inetum

Sept. 2021 — Sept. 2023 · 2 yrs

Mar. 2023 — Sept. 2023

Full Stack Java / Angular Developer

Built a web application managing the allocation of work equipment (company vehicles, phones, PCs…) to new employees and its return when they leave — **GestMat**.

Java 11 · Spring Boot 2 · Angular 14 · Bootstrap 5 · MySQL · H2 Database · Hibernate · Docker · Jenkins · SonarQube · GitLab · Confluence · Jira

- Take part in agile ceremonies (daily, sprint review, retrospective, sprint planning)
- Take part in grooming sessions to size and estimate User Stories
- Manage the backlog
- Deploy to test and production environments with continuous integration
- Set up unit tests
- Develop the application (existing evolutions / new features)
- Develop REST APIs and the front end
- Write specifications and technical documentation
- Identify and fix bugs
- Review other developers' code

Jan. 2022 — Feb. 2023

IT Consultant · Rectorat Nancy-Metz

On assignment at the client, developed an application allowing a student or legal guardian to request exam accommodations — **Incluscol**.

PHP · Symfony · Bootstrap 5 · PHPUnit · MariaDB · Doctrine · Docker · Jenkins

- Take over and nationalise the application
- Maintain and evolve the application
- Attend follow-up and progress meetings with the client's project owner
- Identify and fix bugs
- Deploy to test and production environments with continuous integration
- Develop REST APIs and the front end
- Write detailed specifications
- Support the qualification and release teams in analysing and tracking issue reports
- Prepare and run unit tests
- Write technical and functional documentation

Sept. 2021 — Dec. 2021

Full Stack Java / Angular Developer

Built a web application managing the allocation of work equipment (company vehicles, phones, PCs…) to new employees and its return when they leave — **GestMat**.

Java 11 · Spring Boot 2 · Angular 14 · Bootstrap 5 · MySQL · H2 Database · Hibernate · Docker · Jenkins · SonarQube · GitLab · Confluence · Jira

PMB Software

Sept. 2020 — Aug. 2021

Full Stack PHP / Laravel Developer · Apprenticeship

Developed applications connecting the stakeholders of a house-building project (builders, craftsmen, staff, owners) — **Constéo, Be in Home, Hermès, Visiterre**.

PHP · Laravel · Bootstrap 4 · JavaScript · jQuery · MySQL · Eloquent · Docker

- Provide corrective and evolutive maintenance of applications
- Design and develop new features
- Analyse functional and technical requirements
- Develop REST APIs
- Develop the front end
- Write technical and functional documentation
- Follow development best practices

TECHNICAL SKILLS

LANGUAGES
Java, TypeScript, JavaScript, HTML5, CSS, SCSS

FRAMEWORKS
Spring Boot, Angular, Symfony, Laravel, Bootstrap

LIBRARIES / UI
Angular Material, PrimeNG, RxJS

DATABASES / ORM
PostgreSQL, MySQL, MariaDB · Hibernate, jOOQ, Doctrine, Eloquent · Flyway

API / WEB
REST, SOAP

DEVOPS / CLOUD
Docker, Azure, Jenkins, Ansible, SonarQube

TOOLS
IntelliJ IDEA, VS Code, WebStorm, PhpStorm, Postman, Git, GitLab, Jira, Confluence, Nexus

METHODS
Agile (Scrum), V-model

EDUCATION

2021
Master's in Computer Engineering
Work-study · Université de Lorraine (Metz)

2019
Bachelor's in Computer Science
Université de Lorraine (Metz)

2018
DEUG in Computer Science
Université de Lorraine (Metz)

CERTIFICATIONS

2023
Spring Data JPA

2022
RGAA — Accessibility

2021
Angular
